

MyLENS — Admin Guide

For admins and mentors

English · Easy to follow

Getting started

Welcome to **MyLENS**.

This short guide helps you open the website, sign in, and know where to go.

What is MyLENS?

MyLENS helps students and schools:

- Learn filmmaking skills
- Complete class assignments
- Submit a tourism video for the campaign
- Work as a school team

Students use the **creator** screens.

Mentors and staff use the **admin** screens.

Two things people mix up

Please remember this:

Screen	Meaning
Submissions	Your contest video entry
Learning → My tasks	Class homework for your mentor

They are not the same place.

How to open MyLENS

1. Open the MyLENS website link you were given
 2. Use a modern browser (Chrome, Edge, or Safari)
 3. Sign in, or create an account if you are new
-

Create an account

1. Open **Register**
2. Enter your details carefully
3. Join or select your school when asked
4. Submit

After you register

- Your account may show as **pending**
 - An admin must approve you before full access
 - If you cannot enter the creator home, wait for approval or ask your teacher / MyLENS admin
-

Sign in

1. Open **Login**
2. Enter your email and password
3. Tap or click sign in

Forgot password?

1. On the login page, open **Forgot password**
 2. Enter your email
 3. Open the reset email and set a new password
 4. Sign in again
-

After login — where do I go?

If you are a...	You should see...
Creator (student)	Creator menu: Home, Submissions, Team, Learning, Profile
Admin (staff)	Admin menu: Overview, Submissions, Inquiries, People, Schools, Learning

If you see the wrong area, ask an admin to check your account role.

Creator menu (simple map)

Menu	Use it to...
Home	See what to do next
Learning	Study lessons and do My tasks
Submissions	Create and send your contest video
Team	See school teammates
Profile	Update your details

Admin menu (simple map)

Menu	Use it to...
Overview	See what needs attention
Submissions	Review contest videos
Learning	Build lessons, assignments, and reviews
People	Approve new creators

Schools	Manage schools
Inquiries	Answer school and partnership messages

Tips for a smooth start

- Use the same email every time
 - Check spelling of school name / invite details
 - If a page looks empty, refresh once
 - If learning content is missing, it may still be a **draft** (not published yet)
-

Need help?

1. Read the Creator or Admin guide for your role
 2. Check Troubleshooting
 3. Contact your teacher or MyLENS admin
-

Admin guide

This guide is for **MyLENS admins and mentors**.

Use it to approve people, manage schools, review videos, and run Learning.

Before you begin

You need:

- An admin account
 - Access to the admin dashboard after login
-

1. Overview

Open **Overview**.

Here you can see:

- Key counts (schools, creators, pending items)
- Attention items that need action
- Shortcuts to common work

Start with attention items

If something is waiting, Overview usually points you there first:

- Contest videos to review
 - Learning assignments to review
 - Creators waiting for approval
 - New inquiries
-

2. People (approve creators)

New students often cannot work until you approve them.

1. Open **People**
2. Check **pending** accounts
3. Open a person and approve / activate when ready
4. Confirm they can sign in as a creator

Tips

- Check school details before approving
 - If a creator says the app is empty, confirm their status is active
-

3. Schools

1. Open **Schools**
2. Create a school, or open an existing one
3. Set status (for example active)
4. Share school access details / token when your process uses them

Keep school names clear so creators join the right one.

4. Contest video submissions

Open **Submissions**.

This list is for **campaign tourism videos only**.

1. Open a submission
2. Watch / check the video and details
3. Choose:
 - Approve
 - Request edits (revision)
 - Reject
4. Add clear notes when creators must fix something

Do not mix this with learning homework

Homework reviews are under **Learning** → **Reviews**.

5. Learning workspace

Open **Learning**.

You will see three tabs:

Tab	Purpose
Lessons	Build modules and lesson content
Assignments	Create homework tasks

Reviews	Approve creator homework submissions
----------------	--------------------------------------

How Learning is organised

- A **module** is a folder (example: Camera)
 - A **lesson** is content inside a module (video, live class, document, link)
 - An **assignment** is homework creators submit in My tasks
-

6. Lessons (build content)

1. Open **Learning** → **Lessons**
2. Create a **module** first (New module)
3. Add lessons into that module (Add lesson)
4. Fill title, type, links/files, schedule (for live classes)
5. Tick **Visible to creators** when ready
6. Save

Catalogue tips

- The main screen shows existing content first
 - Use **Add** only when creating new content
 - Use **Edit** only when changing existing content
 - Use the **...** menu for publish / unpublish / delete
-

7. Assignments (homework)

1. Open **Learning** → **Assignments**
2. Choose the module
3. Add assignment title and instructions
4. Choose submission format (text, link, file, or mixed)
5. Optional: due date
6. Tick **Visible to creators**
7. Save

Creators will find these under **Learning** → **My tasks**.

8. Publish rule (very important)

Creators see content only when **both** are published:

1. The **module** is published
2. The **lesson or assignment** is published (Visible to creators)

If either one is still Draft, creators will not see it.

After saving a draft, publish it before telling students to check.

9. Reviews (homework checking)

1. Open **Learning** → **Reviews**
2. Use the queue / filters to find waiting work
3. Open a submission

4. Read the answer / open the file or link

5. Choose:

- Approve
- Ask for revision
- Reject

6. Write short, clear mentor notes when needed

Approved homework can update learning progress for the creator.

10. Inquiries

Open **Inquiries** to handle:

- School contact messages
- Partnership messages

Update status as you reply (for example contacted or closed), following your team process.

Admin quick checklist

- ☐ Approve pending creators
 - ☐ Keep schools up to date
 - ☐ Review contest videos under Submissions
 - ☐ Publish modules + lessons / assignments
 - ☐ Review homework under Learning → Reviews
 - ☐ Clear new inquiries
-

Clear naming helps everyone

Use titles students understand, for example:

- Good: Live class: Camera angles
 - Good: Assignment: 30-second intro film
 - Avoid vague titles like Test 1 or Untitled
-

Troubleshooting

Use this page when something does not work.

Try the steps in order.

Login and account

I cannot sign in

1. Check email and password carefully
2. Try **Forgot password**
3. Ask admin if your account is approved
4. Confirm you are opening the correct MyLENS website

I registered but cannot use creator tools

- Your account may still be **pending**
- Ask a MyLENS admin to approve you under **People**

Forgot password email did not arrive

1. Check spam / junk folders
 2. Wait a few minutes and try once more
 3. Ask admin/developer if email settings need checking
-

Creator: Learning

I cannot see any lessons

1. Refresh the page
2. Confirm you are on **Learning** → **Lessons**
3. Ask admin if the module and lessons are **published**
4. If only homework is missing, check **My tasks** instead

I cannot see my homework

1. Open **Learning** → **My tasks** (not Lessons, not Submissions)
2. Ask admin if the assignment and its module are published
3. Refresh and try again

I submitted a task but status did not change

1. Wait a moment and refresh
2. Confirm you pressed submit (not only save draft)
3. Check you included the required answer format (text / link / file)
4. Ask admin to confirm the submission appears under **Learning** → **Reviews**

Mentor asked for revision

1. Open the task again in **My tasks**
 2. Read the mentor notes
 3. Update your answer
 4. Submit again
-

Creator: Contest video submissions

I cannot create a submission

1. Check if the submission window is open (see Home)
2. Confirm your account is approved
3. Confirm your school/team setup is complete
4. Refresh and try again

My video is stuck waiting

- Admin may still be reviewing it
- Check for notes if status is **Needs edits**
- Fix the requested items and submit again

I uploaded / linked the wrong video

1. Open the submission
 2. Edit if status allows
 3. If locked, ask admin what to do next
-

Admin: People and schools

Creator says they cannot enter

1. Open **People**
2. Check account status is active / approved
3. Confirm role is creator
4. Ask them to sign out and sign in again

Creator joined the wrong school

1. Check school details on their profile
 2. Correct according to your process
 3. Confirm with the school coordinator
-

Admin: Learning publish problems

Creators cannot see a lesson or assignment I added

Check all of these:

1. Item status is **Published** / **Visible to creators**
2. Parent **module** is also published
3. Creators are looking in the correct tab:
 - Lessons → Lessons tab
 - Homework → My tasks tab
4. Ask creator to refresh

I edited content but creators still see old details

1. Confirm you saved the edit
2. Confirm you were editing the correct item (not creating a new one)
3. Ask creators to refresh

Reviews queue is empty

- No creator has submitted homework yet, or
 - You are on a filter with no matching status
 - Try the default queue / clear search
-

Admin: Contest submissions

I cannot find a video

1. Check search and status filters
2. Confirm the creator submitted (not only draft)
3. Open the creator account and verify school

Creator did homework but I cannot find it in Submissions

That is expected.

Homework is under **Learning** → **Reviews**,
not under contest **Submissions**.

Files and uploads

File upload failed

1. Check file size limits shown on the form
2. Use a supported file type
3. Try a stronger internet connection
4. Try again later

Link will not save

- Use a full link starting with `http://` or `https://`
 - Remove extra spaces
 - Try again
-

Still stuck?

1. Note the exact screen name and what you clicked
2. Note any error message text
3. Contact your teacher (creators) or MyLENS technical admin
4. Include your account email and school name
